Irrigation Projects.

MYSORE No. 2228 27 MAY 1967 P.W.D. (RECEIPT & ISSUE SECTION)

24.5.67

From the year 1958 due to the construction of Bhyravanithippa Project in Rayadurg Taluk of Andhra Pradesh, the supply of water to the Hagari River in this part of Bellary district was depleted with the result that the spring channels in the Hagari River in the limits of the above four villages dried up on account of pooling of water in the Upper reach in Rayadurg taluk of Andhra Pradesh. In this connection representations were submitted in 1959 when arrangements for supply of water were made from Bhyravanithippa Project. Similarly during the years 1960 to 1962, the Hon'ble Minister for P.W.D. Government of Mysore arranged for supply of water from Bhyravanithippa Project. In spite of the above arrangements the yield of Paddy crop over the extent of 834 acres was adversely affected during the years 1959 to 1962. A kind perusal of the correspondence, in this matter; made during the years 1959 to 1965 will reveal that the only possibility that was visualised by the authorities of the P.W.D. to get over the difficulty was to arrange for a continuous supply of 150 cusecs of water from Bhyravani Thippa Project every year in order to reap the harvest of Paddy crop in the ayacut of 834 acres under reference.

With the above back ground the irrigation of 834 acres of wet lands has been persistently rendered very difficult year after year and the Government has not been able to arrive at a permanent solution and provide sufficient water supply to the Hagari River.

Added to this, the Government of Andhra Pradesh, are now arranging to put up shutters to the over bridge

Contd...3.

across the Hagari River at Gundlapalli situated downwards the Bhyruvani Thippa Project in Andhra Pradesh with the idea of diverting the Hagari Water from Gundlapalli into the Kanekal Tank of Rayadurg Taluk of Andhra Pradesh which is only 18 miles from Rupanagudi village of Bellary District. This appears to be an additional step to reduce the regular but scanty flow of water in the Hagari River during rainy season that could automatically flow into the Hagari River situated in the limits of Rupanagudi and other villages of Bellary taluk, thus rendering the springs to dry up without water. On account of the above act on the part of the Andhra Government, the Wet ayacut in the villages of Asundi and Tholamamidi has not been brought under cultivation as there was no flow of water in the springs and the extent cultivated with Paddy in the ayacut of Rupanagudi and Kuntanahal are decaying in spite of 200 people set at work daily to dig and tap at Springs to obtain water.

In view of the foregoing facts and in view of the fact that these villages are not benefitted by the advent of High Level Canal in Bellary Taluk, We are forced in this distressed condition to represent to the Hon'ble Chief Minister to get the matter examined and arrive at a permanent solution of providing water for the irrigation of 634 acres of wet ayacut. In this connection we also request the Hon'ble Chief Minister to grant us an interview to enable us to represent our grievances in person about this urgent matter.

Contd...4..

It is needless to point out that the Government have been propagating top priority for Irrigation Food and Agricultural Production and it is our misfortune that a just cause has not been given a permanent solution to reap harvest of paddy over an extent of 634 acres in the famine stricken Taluk of Bellary.

We therefore pray for immediate action in the matter, failing which we will be not only loosing the Paddy crop but we will also be deprived of drinking water for both men and cattle in the villages of Rupanagudi and Rayapuram consisting of a total population of nearly 6,000 and live stock as the spring channels in the Hagari River are the only sources for the supply of water both for Irrigation and drinking. At this part of the Summer we have been undergoing good lot of difficulty in securing drinking water from the Hagari Spring channels as the springs have almost dried up.

In conclusion, we earnestly pray for immediate relief and permanent solution to provide water supply in the Hagari River for Irrigation purposes:

We also submit that the Bellary, Rupanagudi Road over a length of 13 miles has been neglected The P.W.D. attends to repairs only upto a length of 10 miles one furlong where the M.S.R.T.C. Bus stops while the remaining portion has been allowed to its fate. We therefore request that necessary instructions may be issued to the authorities concerned to carry on repairs to the full length of the Bellary-Rupanagudi

Contd...5.

Road. Again the P.W.D. has laid an earthern road between Rupanagudi and Paramadevanahalli villages. We request that this road may be ordered to be converted into a pucca road in order to provide labour to the villages. We have not been having agricultural labour in the villages, due to non cultivation of the entire wet ayacut of 834 acres.

16.5.67.

MYSORE GOVT. No. 4095 21 AUG 1967

Sir,

With reference to the above I write to state there are 3 spring channels in Bellary Taluk namely (1) Talamamidi Spring Channel (2) Asundi Spring Channel and (3) Rupanagudi Spring Channel and they are maintained in good condition. Some cross drainage works and revetments are constructed by P.W.D. and in some other places some more C.D. works are to be constructed for which the detailed estimates are under preparation All the three channels are functioning well and the only ~~and the only~~ trouble is that there is no adequate flow in the river.

Yours faithfully,

EXECUTIVE ENGINEER,
P.W.D. DN. BELLARY.

TOUR NOTES AND INSTRUCTIONS OF THE MINISTER FOR PUBLIC WORKS IN THE DISTRICT OF BELLARY BETWEEN 3-12-1966 & 6-12-1966.

---

xx xx xx xx

Moka.

The Minister laid the foundation stone for the High School Building. When the local people represented about the depleted supply of water in the Harangi Spring channel because of the Andhra Pra-desh Governemt having constructed the Bhairavavanithippa Project, the Minister said that the Government had already taken up the matter with the Andhra Pradesh Govt. and that in the meanwhile, water is being let out from the sluices of the Low Level Canal of the Tungabhadra Project. He said that the Government is in fact insisting upon the Andhra Pradesh Government to let out water through Low Level Canal from out of their quota. He also assured them that water would be made available at any cost in sufficient quantity.

No. PWD 13 BRA 66

To,
The Headquarter Assistant to the
the Deputy Commissioner Bellary.

Sir,

Sub:- Hagari Spring Channels Irrigation Statistics.

I am directed to refer to your D.O. letter No.IRR.56/67-68 R-9. dated 26-9-67 addressed to to the Under Secretary to Government P.W.D.(T) on the above subject and to state that the particulars said to be sent separately under your letter of even number and date are not traceable in this Department. Therefore I am request you to furnish a copy of the same

IRR.No.56/67-68 R9. Office of the Deputy Commissioner, Bellary, dated, 26-9-1967.

To

The Secretary to Government,
Public Works Department (Technical)
Bangalore-1.

MYSORE No 3491 30 SEP 1967 P. W. D. (RECEIPT & ISSUE SECTION)

Sir,

Sub:- Hagari Spring Channels - Shortage of Water due to the construction of B.T.Project.

Ref:- Government Letter No.PWD.13.BRA.66 dated 18-1-1967. P.248 C.F.

---

The Hagari Spring Channels irrigate an area of 1633-92 acres in Bellary Taluk. At the revenue settlement made during 1924, an area of 830-93 acres was classified as single crop wet lands and an area of 802-99 acres was classified as double crop wet lands in six villages commanded by these channels. The total irrgable crop area for both the seasons put together is 2436-91 acres. This constituted the irrigation potential of these channels actually utilised by the cultivators which fact was recognised during the settlement proceedings of 1924. The classification of this area was on a permanent basis and it may be taken as the water capacity of these channels. A statement showing the area included in the registered ayacut of the six villages is enclosed(Statement "A").

As against the irrigation potential permanently recognised in the Settlement Register, Paddy and other dry crops were grown from 1952-53 onwards as indicated in the cultivation statement which is enclosed (Statement "B"). The crop particulars for the years 1950-52 are not available. The crop particulars for the year 1966-67 are not yet compiled due to the Resettlement proceedings and reclassification and change of rates for the use of Government water.

The Bhairavanithippa Project in Rayadurg Taluk of Andhra Pradesh was completed during 1958-59. Which resulted in the reduction of water in the Hagari river. From the year 1962-63 onwards, the entire ayacut registered under the Hagari Spring channels in Moka and Chaganur villages of Bellary Taluk is being fed with the waters of the T.B.P. Low Level ~~Chal~~ Canal and connected against the Mysore State quota. Therefore, the area grown with irrigated crops in these two villages from 1962-63 onwards is to be treated as a further reduction in the total physical area indicated in column 21 of the statement "B". The actual extent under irrigation from the L.L.C. water in these two villages is as follows:-

| | Moka | Chaganur | Total. |
|---|---|---|---|
| 1962-63 | 333-00 ACs | 136-00 ACs | 469-00 Acres. |
| 1963-64 | 406-00 | 134-00 | 540-00 ,, |
| 1964-65 | 401-00 | 123-00 | 524-00 ,, |
| 1965-66 | 215-00 | 121-00 | 336-00 ,, |

The area irrigated with the waters of the Hagari Spring channels exclusive of the extents in Moka and Chaganur villages for the years 1962-63 onwards and the area irrigated prior to that year also the period prior to the construction of the B.T.Project is as under.

....2

| Year | Total area in Acres. | |
|---|---|---|
| 1952-53 | 1298 | |
| 1953-54 | 1461 | |
| 1954-55 | 1376 | for the period before the construction |
| 1955-56 | 1419 | of B.T.Project. |
| 1956-57 | 1257 | |
| 1957-58 | 1531 | |
| 1958-59 | 1538 | |
| 1959-60 | 1474 | |
| 1960-61 | 1461 | |
| 1961-62 | 1352 | |
| 1962-63 | 812 | For the period following the construction |
| 1963-64 | 893 | of B.T.Project. |
| 1964-65 | 503 | |
| 1965-66 | 929 | |

It will be noticed from the above statistics that the water available for the spring channels was substantially reduced due to the construction of the B.T.Project. During the years 1959 to 1962, on representations made by the ayacutdars to the Mysore Government, adhoc releases of water from the B.T.Reservoir was made ~~by the~~ into the river itself by the Andhra Pradesh Government. In the three years immediately following the construction of the B.T.Project, there had been no reduction when compared to the previous years due to such ad-hoc releases. After 1962-63, the average area under irrigation is 742 acres(for the years 1963-64 to 1965-66). This extent is about 50% of the irrigated area in the three years preceding the construction of the project and about 30% of the registered wet area as per the settlement records.

The enclosed statements "A" and "B" may be read with the above clarifications.

Yours faithfully,

(19)

4. P.T.Malla Reddy, Chief Engineer, Irrigation Projects.
5. M.Seetharama Shastry, Superintending Engineer, (Designs), Nagarjunasagar Canals
6. K.V.Ram Mohan. In-charge Director, Interstate matters.

At the outset the Chief Secretary, Andhra Pradesh thanked the Government of Mysore for the arrangements made with regard to holding this Meeting at such a short notice. Drawing attention to the drought situation and scarcity conditions prevailing in many parts of our country, he desired that all problems relating to the utilisation of waters which go a long way for the improvement of Agricultural Production should be viewed on a national basis. Even though most of the subjects had been discussed previously and some of them had been referred to the Government of India for a ...

... Contd..p.2.

BRG

decision in the matter, he observed that it would be desirable that we could discuss them once again so as to see if we could find some points of agreement, so that, the matters could be amicably settled early.

The Chief Secretary to Government of Mysore said that there would be no objection to discussing the subjects referred to Government of India to find out if some solution could be arrived at.

Subject No.1: Division of assets and liabilities under the common portion of the Tungabhadra Project Low Level Canal.

It was agreed to defer this problem till an acceptable principle regarding the sharing of cost of interstate canals was enunciated by the Government of India.

Subject No.2: Power benefits from Munirabad Power. House for Andhra Pradesh.

It was pointed out by the Mysore Representative that the power generated at Munirabad was to be generally utilised in the areas lying in Tungabhadra Project and would not be used for supply to the Hyderabad area. The views expressed by the Gadkari Committee were also referred to. It was desired by the Representatives of the Andhra Pradesh Government that the Gadkari Committee's report should be examined. It was agreed that a copy of the Gadkari Committee's report, if available, be sent to the Andhra Pradesh Government.

Subject No.3: Extension of Left Bank Canal to areas in Andhra Pradesh.

The Representative of Andhra Pradesh contended that the Left Bank Canal should be extended beyond the Mysore State so as to serve the areas in Gadwal and Alampur of Mahaboobnagar district. It was also pointed out that the then Government of Hyderabad in an order issued in January 1955 had mentioned the utilisation of only 72 T.M.Cft. of water under the Left Bank Canal. It was explained by the Mysore Representative that according to the sanctioned Project Report of the Left Bank Canal, out of a net command of 10,80,000 acres, 5.80,000 acres

Contd....P..3

Kaksh/-

were to be irrigated and that this command of 10,30,000 acres wholly lies in the Mysore State. It was agreed that the Government Order referred to by the Andhra Representative and the relevant papers be made available to the Government of Mysore for examination and Government of Mysore may also make available to Andhra Pradesh for study Gadhari Committee report, if available.

Subject No.4: Final sharing of Tungabhadra Project waters at Nallapuram.

This was discussed in general terms along with the other subjects relating to the Tungabhadra Project

Subject No.5: Transfer of control of the Rajolibunda Head Regulator of the First 27 miles to Tungabhadra Board.

It was agreed that the Rajolibunda Diversion scheme Anicut would be inspected in full length by the concerned Chief Engineers and the agreed share of water ensured to the Andhra Pradesh at the State Border in the Rajolibunda Diversion Scheme Canal.

Subject No.6: Transfer of control of Nunirabad Power House to Tungabhadra Board.

The Andhra Pradesh Representative suggested that it was desirable to have the entire control of the release of waters both on Left and Right Banks with the Tungabhadra Board He also indicated that the question of management and release of interstate waters being under the control of River Boards was under the examination of the Government of India. It was pointed by the Mysore Representative that since the major beneficiary under the Tungabhadra Project was Mysore State and since the Tungabhadra Dam lies in the Mysore State, the control of the Dam for regulation of waters should rest with the Mysore Government and that the Andhra Pradesh share of waters would be assured by Mysore State as is being done in the case of Cauvery Waters to Madras State at K.R. Sagar.

Contd.....P.4.

Subject No.7 Inter-State - Andhra Pradesh - Madras - Proposed anicut - Shelf No.3

It was agreed that the Chief Engineer of Andhra State would inspect the anicut and suggest within a period of six months necessary remedial measures.

Subject No.8 Inter-State - Andhra State - Construction of an anicut across Chitravathi river near Pinnapuram and opening new feeder channel to feed 7 tanks - Deficiency in Sukkanatrai tank of Andhra Pradesh.

It was agreed that the Chief Engineer of Andhra Pradesh may write to the Chief Engineer of Mysore and inspect the site and satisfy himself that

a) the anicut has been raised,
b) the left bank channel has been increased in capacity, and
c) the right bank feeder channel has been constructed.

Subject No.9 Tanks in Hindupur Taluk - Lepakshi Village - Investigation of complaints - Raising the sill of Mandlacheruvu tank by Mysore.

It was pointed out by the Mysore Representative that the tank had been restored to its original capacity and that the restoration work had been carried out with the concurrence of the then Madras State, and therefore it was not necessary to furnish any details to Andhra Pradesh. It was, however agreed that the present level of the weir with reference to its level before the restoration be intimated to Andhra Pradesh.

Subject No.10: Interstate Problems - Anantapur district - Tamadipalli tank - Interception of supplies - Bunding.

It was pointed out by the Mysore representative that only little silt matter out of the total flow was impeding facilities for irrigation for the lands situated between the Kattas and the tank. Since the kattas have been in existence long and have been constructed by the ryots in the interest of soil conservation no water is stored by these kattas. The Representative from Andhra Pradesh desired to know that the regular flow in the streams was not diverted by these kattas.

Contd.....3

nsk

and the flow to the lower tanks was not abstracted. It was agreed that the Chief Engineer of Mysore would inspect all these works and forward a detailed report to the Government for further action in the matter.

Subject No.11: Interstate Waters- Mysore State - Diversion of waters of Jayamangali river at Rampur Anicut to feed Rampur tank.

It was agreed that the two Chief Engineers may inspect and select a site for conducting the gaugings.

Subject No.12: Upper Pennar Project of Andhra Pradesh - Acquisition of submersible lands in Mysore Territory by Mysore State.

The Representative of Andhra Pradesh pointed out that his Government had agreed not to store water in the Reservoir beyond 1760, the level which had been previously agreed to by the Mysore Government. The Representative from Mysore desired to know as to how the Andhra Pradesh Government would operate and control the Reservoir so as to limit the Reservoir level to 1760 when the present full reservoir level as constructed is 1763. It was agreed by the Andhra Representative that these details would be furnished and that the water in the reservoir would not be stored beyond the level of 1760, which had been previously agreed to by the Mysore Government. It was also agreed that the financial implications involved with regard to the compensation payable for the lands submerged, the construction of a bridge, etc., be furnished to the Andhra Pradesh Government for further action in the matter.

Subject: No.13: Utilisation in Tungabhadra Basin - Working Table of Lakkavalli Reservoir - Furnishing by Mysore Government.

It was agreed that the matter would be further examined.

Subject No.14: Interstate matters - Construction of new Irrigation Schemes on Pennar and Jayamangali river of Mysore - Regarding.

Even though the construction of these irrigation works were not covered by 1892 Agreement, it was desired by the Andhra Pradesh Representative that as a General principle the details of such irrigation works which might affect supplies

to the irrigation works in the Andhra Pradesh may be furnished, if there was no objection. It was agreed that the matter would be examined.

Subject No.15.- Inter-State problems - Construction of a dam across Pennar at Nandimalikela Village in Mysore State.-

It was pointed out by the Mysore Representative that the Project was not yet finalised and discussion was therefore premature. It was however pointed out by the Andhra Pradesh Representative that since the Project involves sub-mersion of forest areas in the Andhra Pradesh and since it also affects supply to the North Pennar Project already constructed lower down the Project may be taken up after the Andhra Pradesh was consulted in the matter.

Subject No.16.- Irrigation - Construction of Gayathri Reservoir across Suvarnamuki river by Mysore which affects supplies to Bhairavanithippa project in Andhra Pradesh.

It was pointed out by the Mysore Representative that the Gayathri Reservoir was constructed across the Suvarnavathi River which was a non-scheduled stream and that it was not necessary for the Mysore Government to furnish any particulars to Andhra Pradesh Government. It was explained by the Andhra Pradesh Representative that the construction of the Gayathri Reservoir and the Narayanapur anicut lower down, affect supplies to Bhairavanithippa Reservoir in Andhra Pradesh, and therefore it was desired that the details of regulation of water at Narayanapur anicut be furnished to them as agreed to by the two Chief Engineers in 1954. It was pointed out by the Mysore Representative that the Andhra Pradesh Government had construc - ted the Bhairavanithippa Reservoir for storing water for a level higher than what was originally agreed to without the con-currence of Mysore Government and has not furnished the original Project Report in spite of repeated request. It was agreed that the matter would be examined again.

*Chand:

.....7

Subject No.17: Irrigation- Anantapur district- Madakasira Taluk-Raising the waste weir of Madalur tank in Mysore State

It was agreed that if there was any additional submersion the same would be examined and further action taken to see that no damage was caused to lands in Andhra Pradesh.

Subject No.18: Irrigation-Major-Upper Krishna Project Extension of benefits to Gadwal and Alampur Taluks.

It was pointed out by the Andhra Pradesh Representative that the Upper-Krishna Project which was under investigation in the then Hyderabad State contemplated irrigation from the Upper-Krishna to Gadwal and Alampur areas in Mehboobnagar district and that these areas be included in the present Upper-Krishna Project of Mysore State.

It was explained by the Mysore Representative that owing to the Re-organisation of States, Bijapur district which was one of the chronically drought affected areas had come to Mysore State and it was incumbent on Mysore Government to provide irrigation facilities to that area and further since the percentage of irrigation in Mysore State being very low, it may not be possible for Mysore to provide irrigation to areas out side the Mysore State... It was agreed to leave this issue at that stage.

Subject No.19: Rehabilitation in Tungabhadra Project area.

It was agreed that the matter would be placed before the Andhra Pradesh Government for consideration.

Subject No.20: Shortage of supplies to spring channels on river in Hagari in Bellary district Mysore State on construction of Bhairavanitippa Project on the river Hagari in Upper reaches in Andhra Pradesh.

13BRA66.

It was agreed that the reasons for dimunition of supplies may be further examined and discussed again.

krs.

346.

Subject No.[illegible]: Supply of copies of files and other records in respect of Tungabhadra Project as transferred by the Madras State to Andhra Pradesh in October 1953.

It was agreed that the matter would be examined by the Andhra Pradesh Government.

Subject No.22: Allotment of Sandal trees to Andhra Pradesh in 1956-57 and reimbursement of tree tax.

It was agreed that the matter would be decided early by the Andhra Pradesh.

Subject No.23: Transfer of value of Machinery purchased from funds meant for the Tungabhadra Project in Raichur District by the Andhra Pradesh Government under Section 37 of the State's Reorganisation Act 1955.

It was agreed that the Andhra Pradesh would verify old records and decide the matter early.

It was also agreed to confirm the Proceedings of the Meeting held on [illegible].1965.

Conclusion: Summing up the Chief Secretary, Andhra Pradesh, requested that on confirmation of the Proceedings of this Meeting, Orders of the respective Governments regarding the various decisions arrived at this Meeting may be issued by the respective Governments.

Subject:- Nagari spring channels in Bellary - shortage of supply of water consequent on the construction of Bhairavantippa Project.

Ref:- Your D.O. letter No. 13.BRA.66 dated 4-11-1967 addressed to the Chief Engineer (I) (South) Bangalore and copied to this office. P. 353.

---

With reference to the above subject I write to inform you that the detailed report has already been submitted to the Chief Engineer (General) vide this office letter of even number dated 25-10-1967 wherein it was reported that there are three spring channels in Bellary Taluk.

1) Talmamidi spring channel.

2) Asundi spring channel.

3) Rupangudi spring channel.

The above channels are in good condition. All the three channels are functioning well and the only trouble is that there is no adequate flow in the river. As such the presumption of the Andhra Pradesh Government that the spring channels in the Mysore State may not be drawing adequate water for the reason that the channels are not being maintained properly is not correct in view of the fact that the channels are functioning well.

Yours faithfully,

(S.K.Mohan).
Under Secretary to Govt.
P.W.D. (I)

Draft.

The Deputy Commissioner,
Bellary Dist. Bellary.

Sir;

Sub:- Hagari Spring Channels - Shortage of water due to the construction of B.T.P

I am directed to refer to your letter No. IRR 56/67-68 R9 dated 26/27-9-67 on the above subject and to observe as follows:-

In the above letter, you have shown that the six Hagari Spring channels in Bellary Dist. in Mysore State we have according to the 1924 settlement records 830.93 acres of single crop area and 802.99 acres of double crop area. Youf have however shown that the aggregate area under these six spring channels was 2436.99 acres. These figures seems to have been arrived at by adding the single crop wet area and twice the double crop wet area while furnishing information with regards to the area irrigated under the Daroji Tank it has been stated that the single crop wet land would mean land for which water was assured for a period of six months and double crop wet land would mean lands over which water was assured for more than six months. Therefore the actually area under irrigation would mean only the area under single crop and the area under the double crop. Hence it is not clear as to why the area has been doubled under double wet crop an shown the total aggregate area. Nextly it is seen from the statement of irrigation particulars furnished under the six channels yearwise from 1952 to 1966 that under the Talamaddi Rupangudi, Kuntanhal and Assundhi which are receiving water from Hageri River the area irrigated has not undergone any appreciable decline except

during the year 1966-65 when it may perhaps be due to inadequate inflows in the intercatchment, otherwise it is seen that under all these four channels the area irrigated has not registered any appreciable decline after the Bhairvanithippa Dam started operation in 1958 and after it was fully completed in 1962. Further it is also seen that even the registered wet area under Bupangudi and Kuntanhal have not shown any appreciable decline at all. Whereas in the case of Talamaddi or Assundi channels there has been certain reduction with reference to the registered wet area . But since this area was not obtained even prior to the completion of the Bhairvanithippa reservoir under these channels it cannot be said that there has been any appreciable decline in the irrigation under these two channels. ~~With regards to~~ From the area under the Chagnur and Moka channels it is seen that almost constant for the entire period and there has been not much variation. Whereas in the case of Moka channel ther has been a slight reduction in the area during the year 1965-66; and in the previous years it has been almost the same. Further it has been stated by you that these two channels are being irrigated from the waters of L.L.C. since 1962-63. ~~There appears to be a slight inaccuracy in the statement furnished by you in the statement furnished by you~~. It is however seen from the information available that the Moka channel is being supplied with water from the L.L.C. from 1958-59 ~~for a period much earlier than 1962-63~~ and ~~it was only in the case~~ in the case of Chagnur channel ~~that~~ water was supplied from L.L.C. from 1962-63. ~~Further even the areas that are being now~~ irrigated under the Moka and Chagnur channels are much more than what has now been shown by you.

Further Govt. have approved separately in the case of these two channels supplying of water for an area of about 700 acres or more.

Further it is seen that the area irrigated under the Moka channel is available

Sent @ P. (P180)

I am therefore to request you to examine the case further in the light of the above observations and furnish a report indicating the correct figures with regard to the area irrigated under these channels to Govt. in the matter early.

Yours faithfully,

1

U.S.

P.W.D. (T).

with (copy enclosed) is different from the figures now furnished by you. This may be got rectified and correct figures furnished.

Further it may also be clarified as to ~~another~~ ~~Channels~~ whether these channels are covered of a recent cost cum ~~~~ prior to Construction of Reservoir ..

The

Public Works Department.

The Deputy Commissioner,
Bellary District,
Bellary.

Sir,

Subject:- Hagari Spring Channels - Shortage of Water due to the construction Bhairavanithippa Project.

-:o:-

I am directed to refer to your letter No. IRR 56/67-68 RQ dated 26/27-9-1967 on the above subject and to observe as follows:-

From the area under the Chagnur and Moka Channels it is seen that the ~~once~~ area under Chagnur channel has been almost constant for the entire period and there has been not much variation. Whereas in the case of Moka channel there has been a slight reduction in the area during the year 1965-66; and in the previous years it has been almost the same. Further it has been stated by you that these two channels are being irrigated from the water of Low Level Channel since 1962 - 63. It is however been from the information available that the Moka channel is being supplied with water from the Low Level Channel from 1956-57 and ~~from~~ for Chagnur channel water was supplied from L.L.C. from 1964-65. Further it is seen that the ~~new~~ area irrigated under Moka channel as available with (copy enclosed) is different from the figures now furnished by you. This may be get verified and correct figures furnished.

Further it may also be clarified as to whether these channels were assured of a second wet crop ~~period~~ prior to construction of Bhairavanithippa Reservoir.

Yours faithfully,

(S.K. Mohan),
Under Secretary to Government,
P.W.D., (Technical).

18 DEC 1967

Sir,

Sub: Hagari spring channels in Bellary District.

Ref: Your letter No. PWD. 13 BRA 66 dt. 9-6-67. P. 288 c.F.

---

With reference to the above, I am to state that it is reported by the Superintending Engineer, Gulbarga Circle, Gulbarga that the Hagari spring channel in Bellary taluk and District are maintained in good condition. The channels are reported to be functioning all right except that there is no adequate flow in the river itself. As such the contention of the Andhra Pradesh representatives that the spring channels in Mysore State may not be drawing adequate water for the reason that the channels are not being maintained properly is incorrect.

Yours faithfully,

Draft approved by ch...

Sir,

Subject: Hagari Spring Channels in Bellary District - shortage of supply of water consequent on the construction of B.T. Project.

Ref: Government Letter No.PWD 13 BRA 66 dated 18.1.67, (i) even Nos. dated 28.7.67 (ii) 9.6.67 (iv) 20.6.67.

P. 248 C.F.

-:ooOoo:-

1. Government in their letter No.PWD 13 BRA dated 18.1.1967 have desired for the details of the Irrigation statistics under Hagari spring channels for the decade 50 to 60. It is reported by the Superintending Engineer, Tungabhadra Project Circle, that the above details as required by Government have been furnished by the Deputy Commissioner, Bellary District under his No.IRR.No.56/67-68 dated 26.9.1967. However, a copy of the letter of Deputy Commissioner, Bellary with the details of Irrigation Statistics under Hagari Spring Channels is enclosed herein for ready reference along with the statement of the water requirement for the Registered atchkat of Hagari channels.

P. 248. C.F.

P. 332 C.F. 4/18/11

2. Government in their letter No.PWD 13 BRA 66 dated 28.7.67 have called for the details as required by Government of India.regarding crop pattern and releases below Narayanpur Anicut.

P.I 308.

The details of the crop pattern and water requirement as required by Government of India is the same as furnished with this letter. The details of the releases below Narainpur Anicut as received from

PTC

372.

Executive Engineer, Chitradurga Division is enclosed. For any further details, Chief Engineer (General) may kindly be addressed.

3. The details as called for in Government letter No.PWD 13 BRI 66 dated 9.6.1967 has been furnished to Government by Superintending Engineer, Gulbarga Circle, vide his No.TB.4/P&I/8/155/67-68 dated 17.10.1967 as per which the spring channels are reported to be in good condition and functioning well but the trouble is there is no adequate flow in the river.

P.288.C.F.

P.356 C.F.

4. As regards the report required by Government vide their Letter dated 20.6.67, regarding the proposal of Andhra Pradesh of creating temporary storage across Nagari River at the bridge near Rupanagudi, the particulars are still awaited from the Superintending Engineer, Tungabhadra Project Circle. On receipt of which further communication will be sent to Government.

P.292.C.F.

D.A:
Copy of Deputy Commissioner's letter with statements.

rpr 81267

Copy of letter No.IRR.No.56/67-68 R9 dated 26-9-67 from the Deputy Commissioner, Bellary addressed to the Secretary to Govt.PWD (Technical) Bangalore-1.

Sub: Hagari Spring channels - shortage of water due to the construction of B.T.Project.

Ref: Government Matter No.PWD 13 BRA 66 dated 18.1.67.

---

The Hagari Spring channels irrigate an area of 1633-92 acres in Bellary Taluk. At the revenue settlement made during 1924, an area of 830-93 acres was classified as single crop wet lands and an area of 802-99 acres was classified as double crop wet lands in six villages commanded by these channels. The total irrigable crop area for both the seasons put together is 2436-91 acres. This constituted the irrigation potential of these channels actually utilised by the cultivators which fact was recognised during the settlement proceedings of 1924. The classification of this area was on a permanent basis and it may be taken as the water capacity of these channels. A statement showing the area included in the registered ayacut of the six villages is enclosed (Statement 'A).

As against the irrigation potential permanently recognised in the Settlement Register, Paddy and other dry crops were grown from 1952-53 onwards as indicated in the cultivation statement which is enclosed (Statement 'B'). The crops particulars for the years 1960-52 are not available. The crop particulars for the year 1966-67 are not yet compiled due to the Resettlement proceedings and reclassification and change of rates for the use of Government water.

The Bhairavanithippa Project in Rayadurg Taluk of Andhra Pradesh was completed during 1958-59. Which resulted in the reduction of water in the Hagari river. From the year 1962-63 onwards, the entire ayacut registered under the Hagari Spring channel in Moka and Chaganur villages of Bellary Taluk is being fed with the waters of the T.B.P. Low Level Canal and connected against the Mysore State quota. Therefore, the area grown with irrigated crops in these two villages from 1962-63 onwards is to be treated as a further reduction in the total physical area indicated in column 21 of the statement 'B'. The actual extent under irrigation from the L.L.C. water in these two villages, is as follows:-

| | Moka | Chaganur. | Total |
|---|---|---|---|
| 1962-63 | 333-00 Acs. | 136-00 Acs. | 469.00 Acs. |
| 1963-64 | 406.00 | 134.00 | 540.00 " |
| 1964-65 | 401.00 | 123.00 | 524.00 " |
| 1965-66 | 315.00 | 121.00 | 336.00 " |

The area irrigated with the waters of the Hagari Spring channels exclusive of the extents in Moka and Chaganur villages for the years 1962-63 onwards and the area irrigated prior to that year also the period prior to the constfuction of the T.B.P. Project is as under.

| Year | Total area in Acres | |
|---|---|---|
| 1952-53 | 1298 ) | |
| 1963-54 | 1461 ) | For the period before the construction of B.T.Project. |
| 1954-55 | 1376 ) | |
| 1955-56 | 1419 ) | |
| 1956-57 | 1257 ) | |
| 1957-58 | 1531 ) | |
| 1958-59 | 1538 | |

(PTO)

| Year | Total area in acres: | |
|---|---|---|
| 1959-60 | 1474 ) | |
| 1960-61 | 1461 ) | |
| 1961-62 | 1352 ) | For the period follow- |
| 1962-63 | 812 ) | ing the construction |
| 1963-64 | 893 ) | of B.T.Project. |
| 1964-65 | 503 ) | |
| 1965-66 | 929 ) | |

It will be noticed from the above statistics that the water available for the spring channels was substantially reduced due to the construction of the B.T.Project during the years 1959 to 1962, on representations made by the Ayacutdars to the Mysore Government, Adhoc releases of water from the B.P.Reservoir was made into the river itself by the Andhra Pradesh Government. In the three years immediately following the construction of the B.T.Project, there had been no reduction when compared to the previous years due to such adhoc releases. After 1962-63, the average area under irrigation is 742 acres (for the ~~iff~~ years 1963-64 to 1965-66). This extent is about 50% of the irrigated area in the three years proceeding the construction of the project and about 30% of the registered wet area as per the settlement records.

The enclosed statements 'A' and 'B' may be read with the above clarifications.

Yours faithfully,
sd/-

To

The Secretary to the Government of India.
Ministry of Irrigation & Power,
NEW DELHI.

Sir,

Subject: Hagari Spring Channels in Bellary - Shortage of supply of water consequent on the construction of Bhairavanithippa Project.

.....

Reference: 1) Your Ministry letter No.DW.II-32(7)/67, dated 31.7.1967.

2) Your Ministry letter No.DW.II-32(7)/67, dated 21.10.67.

.....

I am directed to invite reference to the letters cited and to state that subsequently the above subject was discussed in the Inter state Meeting held at Bangalore on 28.4.1967 between the representatives of Andhra Pradesh and Mysore. The representatives of this Government, held that the shortage to these spring channels in Mysore was being felt even prior to the construction of Bhairavanithippa Project and that was why the possibility of supplying water from Tungabhadra Project Low Level Canal was proposed. The shortage if any experienced by the ayacut under spring channels cannot therefore be attributed to Bhairavanithippa Project Reservoir. Moreover there is enough free catchment for these spring channels. However it was agreed in the above Interstate Meeting, that the reasons for the diminution of supplies may be further examined and discussed again. The Government of Mysore have been requested to take necessary further action in pursuance of the above decision.

Yours faithfully,

28/2/68

OFFICE OF THE MINISTER FOR PUBLIC WORKS
P 626/68
27 MAR 1968
BANGALORE

Date:- 10-3-1968.

To

The Honourable Minister for
Public Works Department and Irrigation,
Government of Mysore,
Bangalore.

-- Camp:- Bellary.

Sir,

Sub:- Irrigation - Hagari spring Channels - Rupanagudi Village - Bellary Taluk - Inadequate flow of water - permanent relief - requested -

We the ayacutdars under the Hagari Spring channels in Rupanagudi Village of Bellary Taluk, submit the following facts for kind consideration and favourable orders.

Due to the construction of Bhiravani thippa Project in Rayadurg Taluk of Andhra Pradesh to supply of water to the Hagari River in this part of Bellary District has been depleted and the spring channels in the Hagari River have gone dry. We have been employing about 120 to 150 labourers daily to obtain water in the springs to be excavated in a distance of 2 to 3 miles in the Hagari river in order to save the standing crop of paddy in the ayacut. When

When the above is the position, we learn that the Andhra Government, without the concurrence of the Mysore Government has been diverting all the waters of the Hagari River

--contd.

by a diversion weir and letting the water at Gundlapalli into Kanekal Tank of Rayadurg Taluk of Andhra Pradesh. This is only 18 miles from Rupanagudi of Bellary District. This Diversion of Hagari Water at Gundlapalli has adversely affected the flow of water in the Hagari River and the springs have completely gone dry resulting in the loss of standing crops in Rupanagudi Ayacut.

The action of the Andhra Government has affected the riparian rights of the Mysore ryots under Hagari Spring Channels.

We therefore request the Honourable Minister to take up the above issue with the Andhra Government and safe-guard the interests of the Ayacutdars under the Hagari spring channels by stopping the construction of the diversion Project at Gundlapally of Rayadurg Taluk, pending decision in the matter.

In the alternative, the Andhra Government may be persuaded to leave a regular discharge of 150 Cusecs of water down the Hagari River from the Bhairavanithippa project as was done during the years 1959 and 1960, to save the standing crops under the Hagari spring channels in Rupanagudi Village.

We further submit that the supply of water from T. B. Project High Level

--Contd.

Cannal may be made through distributary No. 16-A juncture to serve as a permanent/~~fmxkxrm~~ for the irrigation of lands towards the left side of the Hagari river.

As there is standing crops in the entire ayacut at present, we humbly request that some arrangement for adequate supply of water may kindly be decided upon in order to avoid the crops getting spoiled.

Yours faithfully,
Rama Rao

The Minister for Public Works has kindly desired to know the stage at which the matters stand and also desired to take immediate action in respect of the following:-

1. Manchanabele Project:- Revised Project Report or Proforma may be sent to Govt. of India (as per Dr. K.L. Rao's inspection notes) - Action to be taken regarding collection of advance Betterment Contribution, since the people are willing to pay Advance Betterment Contribution

2. Allowing of water for Spring Channels from Bhairavani Thippa Project:-

This matter may have to be referred to Arbitration, hence may be detaily examined and the file to be put up for perusal of Minister.

3. Harangi and Hemavathi Projects:- Additional information sought for by the C.W. & P.C. may have to be furnished immediately, to press for early clearance.

PWD (Spl. Irrgn). No 1080 Date 15.4.68

4. Gulbarga under-ground Drainage Scheme:- Action taken by the Chief Engineer regarding implementation of this Scheme may be ascertained.

5. Jambadahalla Project:- Claims of the Contractor regarding construction of this Project. The matter may have to be expedited.

6. Kundagol Water Supply Scheme:- Water stopped since 18 days. A detailed report may be obtained.

7. Stage of work of the Committee constituted for settlement of claims

Copy of the above is forwarded to the (1) Deputy Secretary (Services), (2) Major Irrigation Section, (3) General Irrigation Section, (4) Special Irrigation for necessary action immediately.

Sir,

Sub: Hagari Spring Channels in Bellary District - Shortage of supply of water due to construction of Bhairavanithippa Project -

PWD (Spl. Irrgn). No1412 Date 14/5/68

Ref: Your letter No.PWD.13.BRA.66, dated 8..4..1968.

-:ooo:-

P. 393 of C.F.

I am directed to invite reference to the letter cited, and to state that the requirements of the Standing crop under Bhairavanithippa Project are to be initially met from out of the storage and thereafter, if any surplus waters are found available they are to be made available to meet the requirements of ayacut under the 22 spring channels, taking off immediately downstream of of the Bhairavanithippa Reservoir in Andhra Pradesh area which have no substantial source of supply and are more seriously affected than the spring channels of Mysore. There is practicalby, no possibility of effecting releases for the sake of Mysore spring channels. In the circumstances, it is regretted that the Government of Andhra Pradesh are not in a position to agree to the request for the release of 10 cusecs of water.

I am also to point out that during the years 1959 and 1960, releases were made from the Bhairavanithippa Project for the aid of the ayacut under Mysore spring channels only, as an act of Interstate good neighbourliness and as there was surplus waters available in Bhairavanithippa Project whose ayacut was then in initial stages of development. This act of goodness shown by Andhra Pradesh can not be taken as a precedent to claim the releases from the Bhairavanithippa Project as a right by Mysore Government.

Yours faithfully,

(D. Venkatadri)
for Secretary to Government.

Sir,

Subj:- Hagari spring channels in Bellary District - Shortage of supply of water due to construction of Bhairavanithippa Project.

Ref:- Your letter No. 1741-II/68-3 dated 7th May 1968.

---

I am directed to invite reference to the letter cited and to state that the Hagari spring channels were in existence prior to the construction of the Bhairavanithippa ~~Project~~ reservoir and ~~as such~~ the needs of these spring channels in Mysore State will have to be first met before the waters from the Bhairavanithippa reservoir are diverted for utilisation under that project. The demand of waters of the Hagari spring channels in Mysore State is therefore a prescriptive right and cannot be overlooked ~~and is not based on any act of goodness by Andhra Pradesh.~~

Yours faithfully,

25/5

Secretary to Govt.,
P. W. D.

D R A F T.

No. PWD 13 BRA 66

To

The Secretary to Government of Andhra Pradesh,
Public Works Department,
HYDERABAD.

Sir,

Subj:- Hagari spring channels in Bellary District - Shortage of supply of water due to construction of Bhairavanithippa Project.

Ref:- Your letter No.1741-II/68-3, dated 7th May 1968.

It has been stated that the requirements of the Standing Crops under the Bhairavanithippa Project are to be initially met from out of the storage and thereafter if any surplus waters are found available they are to be made available to meet the requirements of the ayacut under the spring channels taking off immediately down strea of the Bhairavanithippa reservoir in Andhra Pradesh area. It was exactly for this reason that this Government had asked for a copy of the Bhairavanithippa Project report so as to ensure that the project provided for supply of the existing irrigation under the spring channels in Mysore below the Bhairavanithippa reservoir. Instead of furnishing a copy of the Bhairavanithippa project report the Government of Andhra Pradesh intimated in D.O. letter No. RCH.I/71363/59 dated 27-2-1963 from the Adviser and Consulting Engineer to Government of Andhra Pradesh to the Joint Secretary, Public Works Department, Mysore that the Andhra Pradesh have already made available to Mysore the full up-to-date particulars of Bhairavanithippa project in the form of "B Proforma" furnished to the Krishna - Godavari Commission which is reproduced in the Annexure IX to the Krishna - Godavari Commission report.

The particulars furnished under Bhairavanithippa Project in Annexure IX of the report of Krishna - Godavari

Commission stated clearly that below this reservoir there are 22 spring channels irrigating 8,500 acres in Andhra Pradesh and 6 spring channels irrigating 1575 acres in Mysore for which supply has to be let down below the Dam. It is clear therefore from this that the requirements of the spring channels in Mysore has to be met with from the Bhairavanithippa reservoir. Since those spring channels have been in existence prior to the construction of the Bhairavanithippa reservoir and the utilisation of waters under the Bhairavanithippa project can be only after meeting the requirements under these spring channels and not the other way as mentioned in the letter cited. The demand of waters of the Hagari spring channels in Mysore State is therefore a prescriptive right which cannot be overlooked by Andhra Pradesh. The letting down of waters from Bhairavanithippa reservoir for meeting the needs of the spring channels in Mysore State is not cannot therefore be considered as an act of goodness shown by Andhra Pradesh but it is only an act in discharge of the responsibilities resting on the Bhairavanithippa reservoir towards the prescriptive rights existing under these old spring channels.

Yours faithfully,

Secy. to Govt. PWD

Letter No.RCHI /71363/59 dated 27.2.63 from Sri L.Venkatkrishnan, Irrigation Adviser & Consulting Engineer to Govt. Andhra Pradesh, Hyderabad Dn. addressed to Jt. Secretary to Govt. of Mysore,PWD. Bangalore.

--

Sub:- Yield data particulars - furnishing of - Reg.

REF:- 1)My D.O.Lr.No.RC.H1.71863/59 Dt.11.x.62 and 10.12.62
2)Your D.O.No.PWD 11 BRA 62 Dt.8.1.1963.

In continuation of my D.O.letter first cited and with ref. to the points raised in your D.O.second cited, I have to draw your attention to the following position.

At the Inter-State Minister's conference held on 6.6.1959, to which a reference has been made in your D.O. cited, Andhra Pradesh agreed to furnish the Bhairavanithippa Project report to Mysore, while Mysore agreed to furnish the particulars of the Narayanapuram anicut scheme and the lift irrigation scheme in Mysore along the Hagari River and of the Gayatri Reservoir which has since comeup, while Mysore has not so far made available to Andhra Pradesh, the particulars referred to and has systematically avoided giving the above, Andhra Pradesh has indirectly made available to Mysore the full uptodate particulars of Bhairavanitippa project in the form of 'B.Proforma' furnished to the Krishna Godavari Commission which has since been reproduced in the Annexure.IX to the K.G.Commission' s report, copy of which should now be available with the Mysore Govt. But similar full particulars in respect of the Narayanpuram anicut and the Lift irrigation schemes along the Hagari in your State, to be furnished as per the June, 1959 Conference proceedings, are not available in the information circulated by the K.G.Commission.

Further, it may not be out of place to bring to your notice that there are several cases in which your Govt. have failed to honour and comply to the agreements previously reached in regard to exchange of information or action to be taken to settle the various Inter-State disputes amicably based on the agreed conditions, agreed to between the Highest technical authorities of both the States (namely the Chief Engineers). I am to request you to refer in this connection the pending cases with your Govt. in regard to the following viz.,

1. the data pertaining to the Lakkavalli reservoir working tables.
2. the particulars of abstractions in Mysore in the Hagari basin, called for in connection with the Gayatri reservoir.
3. the dispute in regard to the dimunition of supplies to the Agali tank of Andhra Pradesh - action to be taken to assure supplies.
4. Tanks in Hindupur taluk - Lepakshi village of Andhra Pradesh abstraction of supplies due to Kanchi - Samudram tank of Andhra Pradesh by the raising of the Nagaragiri tank weir of Mysore -regarding.
5. Deficiency in supplies to the Bukkapatnam tank of Andhra Pradesh by the construction of anicut across Chitravathi river near Tirumani and the opening of a new feeder channel by Mysore State
6. Particulars to be furnished about the works referred to in the Mysore information bulletin of 1947.

412

7. Submersion of lands due to raising of Muddalore tank weir by Mysore.

xiii. Particulars of tanks constructed by Mysore across Chikkahagari near Tuppadahalli and across Sokkehalla near Gadimakunta to be furnished to Andhra Pradesh.

ix. Interception of supplies by the Mysore Kattes affecting supplies to the Tammadahalli tank of Andhra Pradesh.

x. Particulars of Mysore Govt.'s proposal in regard to the restoration of Yakarlapalli tank in the Madhugiri taluk of Mysore State.

xi. Acquisition of submergible lands in Mysore State under the Upper Pennar Project of Andhra Pradesh as agreed to at the June, 1959 conference.

xii. Diversion of Jayamangali river waters to feed Rampur anicut of Mysore - action to be taken in regard to joint gaugings as agreed to between the Chief Engineers.

In view of the unhelpful attitude which the Mysore Government is extending towards all the above cases, it is not in anyway justifiable to quote agreements against Andhra Pradesh. It cannot all be one way traffic. Mysore is also equally bound to honour the agreements reached on the same footings as she expected the Andhra Pradesh Govt. to act when such reciprocity is available Andhra Pradesh Govt. will not be found lacking in its faith.

I am therefore to inform you that until such time as you can furnish the full particulars of the Narayanapur anicut and the lift irrigation schemes along the Hagari in your State, no useful purpose will be served by these unilateral demands, As such I request that early action may please be taken at your end in this regard.

~~Yours faithfully,~~

GOVERNMENT OF MYSORE

No. PWD 13 BRA 66

MYSORE GOVERNMENT SECRETARIAT,
VIDHANA SOUDHA,

FROM

*Dated, Bangalore,* 1st June 196 8

The *Secretary to the Government of Mysore,*
Public Works & Electricity Dept.

To

The Secretary to Government of Andhra Pradesh,
Public Works Department,
Hyderabad.

Sir,

Sub:- Hagari Spring Channels in Bellary District - Shortage of supply of water due to construction of Bhairavanithippa Project.

Ref:- Your letter No.1741-II/68-3 dated 7th May 1968.

---

It has been stated that the requirements of the standing crops under the Bhairavanithippa Project are to be initially met from out of the storage and only thereafter if any surplus waters are found available are to be made available to meet the requirements of the ayacut under the spring channels taking off immodiately down stream of the Bhairavanithippa Reservoir in Andhra - Pradesh area. Exactly for this reason only this Government had desired for a copy of the Bhairavanithippa Project report to ensure that the project provided for supply of water to the existing irrigation under the spring channels in Mysore below the Bhairavanithippa Reservoir. Instead of a copy of the - Bhairavanithippa Project report being made available, the Government of Andhra Pradesh intimated in D.O.letter No.RCH.I/71363/59 dated 27-2-1963 from the Adviser and Consulting Engineer to Govt. of Andhra Pradesh to the Joint Secretary, Public Works Department, Mysore, that the Andhra Pradesh have already made available to Mysore the full up-to-date particulars of Bhairavanithippa Project in the form of "B Proforma" furnished to the Krishna Godavari - Commission which is reproduced in the Annexure-IX to the Krishna - Godavari Commission report.

The particulars furnished under Bhairavanithippa Project in Annexure-IX of the report of Krishna - Godavari Commission state clearly that "below this reservoir there are 22 spring channels irrigating 8,500 acres in Andhra Pradesh and 6 spring channels irrigating 1,575 acres in Mysore for which supply has to be let down below the Dam". It is clear therefore from this that the requirements of the spring channels in Mysore has to be met with from the Bhairavanithippa Reservoir. These spring channels have been in existence prior to the construction of the Bhairavanithippa Reservoir and the utilisation of waters under the Bhairavanithippa Project can be only after meeting the requirements under these spring channels and not the other way as mentioned in the letter cited. The demand of waters of the Hagari spring channels in Mysore State is a prescriptive right which cannot be overlooked by Andhra Pradesh. The letting down of waters from Bhairavanithippa Reservoir for meeting the needs of the spring channels in Mysore State is not an act of goodness shown by Andhra Pradesh but it is an ~~xxxxxxxx~~ obligation in discharge of the responsibilities resting on the Bhairavanithippa Reservoir towards the prescriptive rights existing under these old spring -

p.t.o.

AIH

channels. I am to request that action may therefore be taken by Andhra Pradesh Government to ensure that adequate water is released from Bhairavanithippa Reservoir for meeting the requirements of Hagari Spring Channels in Mysore State.

Yours faithfully,

o/c
